## I. INTRODUCTION

The “Overview of USAID Basic Education Programs” was compiled in response to an expressed need for data on the countries in which USAID has established basic education programs. In FY 2001, USAID continued or initiated basic education programs in 25 countries around the world in three regions: Africa, Latin America and the Caribbean, and Asia and the Near East. In this companion document to *USAID: Progress in Basic Education, 2000-2001*, information is presented in lists and tables to facilitate a quick understanding of the problems that USAID basic education programs face and USAID’s responses to those problems. These brief presentations complement the “Progress in Basic Education” report, which provides narrative about USAID’s policies, programs, and achievements.

Statistics and bulleted descriptions are organized into three major sections, as follows.

- *Regional Overviews:* A few key education statistics are presented for the countries in which USAID works to present a snapshot of the education system in each country in the three regions of focus in FY 01. USAID basic education funding levels are included for reference. It is important to note that much of the data typically available to describe education problems in developing countries focuses on access to or enrollment in school. In the Latin America and Caribbean (LAC) Region, these data are not as relevant as they are for other regions since access to primary education has been a target of governments and donors in LAC for over thirty years, and thus enrollment figures for the region reflect progress made. Moreover, enrollment data for LAC can be misleading as gains have been extremely uneven, particularly in the poorer countries of Central America and the Caribbean such as Nicaragua and Haiti. Students in schools in the LAC Region have extremely high repetition and dropout rates, and low attendance, which, when combined with low teaching quality, contribute to poor performance on international tests and an additional four to eight years for completion of six primary school grades.
- *Overview of Washington Programs:* The information on the Washington USAID offices and bureaus completes the picture of how USAID budgets and uses its funding to support basic education activities. A brief description of each office’s activities is provided to demonstrate the breadth of global activities to which USAID contributes.
- *Country Overviews:* The country overviews provide information about the programs USAID implemented in each country with a basic education program in FY 01. The education problems that these programs addressed and the implementing partners are listed. Finally, the section includes a few of the results expected from the USAID programs and the progress that USAID made.

			Total:	58.512	54.439	60.295

Note: Kenya received \$2 M in ESF funds in FY 1999 for the Basic Educational Support Program. The money was used to allow children of parents affected by the August 7, 1998 bombing in Nairobi to remain in school while their parents recovered physically and economically. The program will end in 2002.

Data in the regional overview tables taken from year prior to 1996 are indicated by the following symbol: †.

			<b>Total:</b>	<b>11.526</b>	<b>10.750</b>	<b>9.867</b>

**Note:** Burma received \$0.5 M in CSD funds in FY 1999 for education assistance to Burmese refugees in Thailand along the border. World Learning/World Education Consortium is the implementing partner, and the project will end in 2002. USAID does not maintain a field presence in either Burma or Thailand.

**Note:** West Bank/Gaza received \$4.4 M in ESF funds in FY 2000 for basic education as part of a larger Community Services Program. Basic education activities include teacher training, provision of school equipment (desks, chairs, blackboards), and building or repairing classrooms. Activities are through Save the Children, CARE, World Vision, Catholic Relief Services, Cooperative Housing Foundation, YMCA, America Near East Relief Aid, International Youth Foundation, United Nations Development Program, and Palestinian NGOs.

### III. OVERVIEW OF WASHINGTON PROGRAMS

Office Name	USAID Budget for Basic Education (\$ Millions)			Purpose
	1999	2000	2001	
<b>Bureau for Global Programs, Field Support and Research, Center for Human Capacity Development</b>	4.595	8.534	5.925	<ul style="list-style-type: none"> <li>• Supports field mission basic education programs worldwide</li> <li>• Provides technical leadership to human capacity sector</li> <li>• Develops and disseminates technical research in basic education</li> </ul>
<b>Bureau for Global Programs, Field Support and Research, Office of Women in Development</b>	2.840	2.340	2.340	<ul style="list-style-type: none"> <li>• Integrates strategies to address gender inequities into all basic education programs</li> <li>• Identifies emerging education issues and gender-appropriate responses</li> </ul>
<b>Bureau for Policy and Program Coordination</b>	0.281	0.493	0.472	<ul style="list-style-type: none"> <li>• Ensures that program policies, plans, and approaches reflect current knowledge and best practice</li> <li>• Ensures that development policies, strategies, and approaches are consistently, coherently, and effectively implemented</li> </ul>
<b>Bureau for Humanitarian Response, Office of Food for Peace</b>	0.680	1.206	0.459	<ul style="list-style-type: none"> <li>• Implements food for education programs, through commodity donations to cooperating sponsors (Private Voluntary Organizations, Cooperatives, and International Organization Agencies) to address both food security and education needs</li> </ul>
<b>Bureau for Humanitarian Response, Office of Private and Voluntary Cooperation</b>	0.720	0.480	0	<ul style="list-style-type: none"> <li>• Provides direct support to efforts made by U.S. private voluntary organizations and their local partners (NGOs) to address education needs in developing countries and emerging democracies, including strengthening the capacity of local NGOs</li> </ul>

Office Name	USAID Budget for Basic Education (\$ Millions)			Purpose
	1999	2000	2001	
Bureau for Africa, Office of Sustainable Development	7.770	7.503	6.585	x Offers research and strategic guidance to strengthen Africans' abilities to craft and carry out new basic education development policies, programs, and strategies
Bureau for Africa, Office of Development Planning	0	0.181	0	x Defines the overall policy, program, and procedural framework within which country basic education programs are designed
Bureau for Latin America and the Caribbean, Office of Regional and Sustainable Development	6.450	4.900	6.290	x Implements a regional program that is building constituencies for educational policy reform, and improving accountability and transparency in educational management x Implements a program that trains disadvantaged youth from LAC countries in technical, academic, and leadership skills x Provides assistance to missions in the design, implementation, and evaluation of basic education programs and strategies
Bureau for Asia and the Near East, Office of Strategic Planning, Operations and Technical Support	0.100	0.250	0.272	x Provides technical expertise to support bilateral basic education program development
<b>Total:</b>	<b>23.436</b>	<b>25.887</b>	<b>22.343</b>	

Note: USAID budget figures for the Bureau for Latin America and the Caribbean each include \$2 M for the Georgetown/CASS participant training program. FY 1999 also includes \$1 M transferred to the field missions for the Presidential Summit Initiative.

2001	39%	

## GHANA

A. Strategy Statement

To increase the effectiveness of the primary school education system by: strengthening the management capacity of district offices; improving the policy development and implementation process; improving the quality of teaching through student-centered teaching methods, better classroom management, and increased accountability; and by encouraging greater community involvement and participation.

B. Country Statistics <sup>1\*</sup>

- x # Primary school-age children: 3.2 million
- x Total # of children enrolled in primary schools as a % of primary school-age children: 79
- x # Primary school-age children out of school:
- x Primary school student to teacher ratio: 30:1
- x Expenditures on education as % GNP: 4%
- x Host country expenditures on primary education as a % of total education expenditures: 29%

C. Basic Education Problems

- x Lack of access to schools
- x Centralized education system
- x Significant gap between girls' primary school enrollment and completion
- x High dropout rates
- x Lack of community involvement
- x Outdated and ineffective teaching methodology

D. USAID Funding

FY 1999 \$7.695 M	FY 2000 \$5.870 M	FY 2001 \$5.857 M
-------------------	-------------------	-------------------

E. USAID Basic Education Activities

- x Teacher and administrator training
- x Curriculum development
- x Policy reform for decentralization of management
- x School-community partnerships and PTAs

F. Primary USAID Partners

- x Academy for Educational Development (with American Institutes for Research & Aurora Associates)
- x The Mitchell Group (with HIID)
- x Education Development Center (with CARE and Save the Children)
- x International Foundation for Education and Self-Help
- x Catholic Relief Services

**GHANA (continued)****G. Results from USAID-funded Activities**

- The percent of teachers using new teaching techniques has increased

**Indicator:** Percentage of teachers using pupil-focused teaching practices in partnership schools

## MALAWI

### **A. Strategy Statement**

To support the development of an education sector reform that brings about improvement in educational quality, access, and efficiency. This will be achieved through: the establishment of schools in targeted areas; teacher training; the creation of community school improvement committees; the formulation of policy and investment reform strategies; and a special focus on improving the quality of education, especially for girls.

### **B. Country Statistics**<sup>1\*</sup>

- # Primary school-age children: 2.1 million
- % Primary school-age children enrolled: 103%
- # Primary school-age children out of school: 0
- Primary school student to teacher ratio: 59:1
- Expenditures on education as % GNP: 5%
- Host country expenditures on primary education as a % of total education expenditures: 59%

### **C. Basic Education Problems**

- Poor quality of education
- Inefficiencies in education system
- Need for more community involvement in schooling
- Need for improved opportunities—especially for girls
- Outdated and ineffective teaching methodology

### **D. USAID Funding**

FY 1999 \$4.864 M	FY 2000 \$2.875 M	FY 2001 \$4.011 M
-------------------	-------------------	-------------------

### **E. USAID Basic Education Activities**

- Training teacher trainers and school committees
- Monitoring implementation of policy reforms
- Identifying local constraints to educational quality
- Promoting community involvement in schools
- Management training for head-teachers
- Training teachers in more effective, participatory methodology

### **F. Primary USAID Partners**

- Creative Centre for Community Mobilisation
- Save the Children
- Academy for Educational Development (with Aurora Associates)
- American Institutes for Research
- Malawi Institute of Education
- Three government ministries: Ministry of Education, Science and Technology; Ministry of Finance; and Ministry of Gender, Youth and Community Services

**MALAWI (continued)****G. Results from USAID-funded Activities**

- The percentage of children repeating grades has decreased

**Indicator:** Percentage of girl and boy repeaters in grades 1 and 3

YEAR	PLANNED	ACTUAL
1998		boys: 17% girls: 18%
1999	boys: 17% girls: 18%	boys: 19% girls: 18%
2000	boys: 17% girls: 17%	boys: 17% girls: 17%

- Achievement test scores for English reading have increased

**Indicator:** Percentage increase in grade 3 English test scores

YEAR	PLANNED	ACTUAL
1999	boys: 20% girls: 20%	boys: 14.61% girls: 10.34%
2000	boys: 20% girls: 20%	
2001	boys: 20% girls: 20%	
2002	boys: 20% girls: 20%	

- School effectiveness has increased in target areas

**Indicator:** Percentage of schools with functional school management committees

YEAR	PLANNED	ACTUAL
1998		13.2%
1999	70%	77.6%
2000	90%	91.4%
2001	95%	
2002	100%	
2003	100%	

**MALI (continued)****G. Results from USAID-funded Activities**

- The percentage of children enrolled in primary school has increased  
**Indicator:** Number of girls and boys of any age enrolled in primary school as a percentage of the school-aged population (gross enrollment ratio)

YEAR	PLANNED	ACTUAL
1997	47.4%	50%
1998	49.5%	55.6%
1999	56%	57.8%
2000	59%	
2001	62%	

- There has been an increase in access to primary school  
**Indicator:** Number of boy and girl students of any age newly enrolled in grade 1 as a percentage of the total population of children aged 7 (gross access rate)

YEAR	PLANNED	ACTUAL
1997	41.3%	47.1%
1998	46.8%	52.9%
1999	54%	53.8%
2000	57%	
2001	59%	

**NAMIBIA (continued)****F. Primary USAID Partners**

- University of Montana
- University of Western Cape RSA
- Harvard Institute for International Development
- University of Namibia
- Rossing Foundation
- Academy for Educational Development
- International Foundation for Education and Self-Help
- Schoolnet

**G. Results from USAID-funded Activities**

- The quality of primary school teachers has improved in targeted classrooms

**Indicator:** Development of teacher training modules in local languages

YEAR	PLANNED	ACTUAL
1997	Grade 1 materials produced and distributed	Completed
1998	Grade 2 materials produced and distributed	Completed
1999	Grade 3 materials produced and distributed	Completed
2000	Grade 4 materials produced and distributed	Completed

- The delivery of quality primary education was improved by providing leaders with management training

**Indicator:** Number of administrators and managers participating in training programs

YEAR	PLANNED	ACTUAL
1997	4	27
1999	14	36
2000	36	

- The delivery of quality primary education was improved through the implementation of effective monitoring and evaluation systems

YEAR	PLANNED	ACTUAL
1998	2 reports	2 reports
1999	3+ reports	5 reports
2000	3+ reports	

## NIGERIA

### A. Strategy Statement

To develop a foundation for educational reform through: engagement with public and private sector groups and collaboration with the Government of the Federal Republic of Nigeria (GFRN); the implementation of Education Sector Assessment (ESA) activities; the completion of a baseline education census; and assistance in streamlining Education Secretariat personnel.

### B. Country Statistics <sup>1\*</sup>

- x # Primary school-age children: 17.7 million
- x Total # of children enrolled in primary schools as a % of primary school-age children: 98
- x # Primary school-age children out of school:
- x Primary school student to teacher ratio: 37:1
- x Expenditures on education as % GNP: 1%
- x Host country expenditures on primary education as a % of total education expenditures:

### C. Basic Education Problems

- x High dropout rates
- x Weak management
- x Significant gap between girls' primary school enrollment and completion
- x Inaccurate education data

### D. USAID Funding

FY 1999 \$0 M	FY 2000 \$2 M	FY 2001 \$3.163 M
---------------	---------------	-------------------

### E. USAID Basic Education Activities

- x Education sector assessment planned
- x Education Management Information System planned
- x Baseline education data collection to carry out future education analyses
- x Entrepreneurial and micro-enterprise training for youth

### F. Primary USAID Partners

- x Opportunities Industrialization Centers International

### G. Results from USAID-funded Activities

\*The education program in Nigeria is still in its preliminary stages. USAID is currently developing a strategy in collaboration with the Government of the Federal Republic of Nigeria (GFRN).

- x In 2000, USAID, along with other donors, helped to secure a commitment on the part of the Federal Ministry of Education (FMOE) to conduct a baseline education census during the current 2000/2001 academic session.
- x USAID collaboration and technical assistance led to the incorporation of the Education Sector Analysis Secretariat within the FMOE, supporting institutionalization of sector assessments and contributing to the streamlining of Secretariat personnel from a proposed 100 to a current total of 28.

## SOUTH AFRICA

### **A. Strategy Statement**

To expand access to high quality education and training for increased economic growth and improved national living standards. Priority areas are: to reduce inequalities in basic facilities and learning resources; to address high levels of illiteracy among youth and adults; and to intensify the fight against sexual harassment, violence, and the scourge of HIV/AIDS. This will be achieved through: the revision of secondary school curriculum; the training of educators, principals, and leaders; the development of strategies to address the impact of HIV/AIDS on the education sector; and adult literacy programs.

### **B. Country Statistics<sup>1\*</sup>**

- # Primary school-age children: 6.4 million
- % Primary school-age children enrolled: 101%
- # Primary school-age children out of school: 0
- Primary school student to teacher ratio: 36:1
- Expenditures on education as % GNP: 8.0%
- Host country expenditures on primary education as a % of total education expenditures: 44%

### **C. Basic Education Problems**

- Lack of HIV/AIDS awareness among teachers and students
- Lack of access to reading materials
- Girls streamlined into traditional fields of study
- Adult illiteracy
- Sexual harassment and gender-based violence in schools

### **D. USAID Funding**

FY 1999 \$5.3 M

FY 2000 \$3.988 M

FY 2001 \$3.0 M

### **E. USAID Basic Education Activities**

- Providing books and reference materials to schools
- Providing a long-term HIV/AIDS advisor to the Department of Education
- Technical assistance in developing strategies and curriculum to combat HIV/AIDS
- Girls' education
- Curriculum development
- Adult literacy education

## SOUTH AFRICA (continued)

### **F. Primary USAID Partners**

- South African and U.S. universities
- ABT Associates
- Research Triangle Institute
- United Negro College Fund
- Academy for Educational Development
- Institute for International Education
- Sesame Workshop
- Aurora Associates
- African Training for Leadership and Advanced Skills
- The KRA Corporation
- Development Associates

### **G. Results from USAID-funded Activities**

- The quality of higher education has been improved through the development of revised curricula within Historically Disadvantaged Institutions (HDI)

**Indicator:** HDI departments with revised curricula

YEAR	PLANNED	ACTUAL
1999	16	16
2000	34	34
2001	N/A	N/A

\* This is the last time that this indicator is being reported; emphasis will shift to implementation of the revised curricula in 2001.

- There has been an increase in adult access to quality education and training  
**Indicator:** Number of trainees from disadvantaged communities that finished USAID-supported professional, occupational, and skills training programs

YEAR	PLANNED	ACTUAL
2000	850	1159
2001	3684	
2002	3500	
2003	3000	

## UGANDA

A. Strategy Statement

To increase the percentage of Ugandan children who have access to quality basic education by: increasing the availability of teachers and classrooms; improving the quality of teacher instruction; increasing girls' participation in education; raising and maintaining Government of Uganda budget support; and improving the management of primary schooling by local administrators and civic organizations.

B. Country Statistics <sup>1\*</sup>

- x # Primary school-age children: 4.3 million
- x % Primary school-age children enrolled: 69%
- x # Primary school-age children out of school: 0
- x Primary school student to teacher ratio: 35:1
- x Expenditures on education as % GNP: 3%
- x Host country expenditures on primary education as a % of total education expenditures:

C. Basic Education Problems

- x Shortage of teachers, classrooms, and textbooks/materials
- x Poor quality of instruction
- x Girls' lack of participation in education
- x Lack of effective management of schools by local administrators
- x High repetition rates

D. USAID Funding

FY 1999 \$8.577 M	FY 2000 \$8.811 M	FY 2001 \$8.799 M
-------------------	-------------------	-------------------

E. USAID Basic Education Activities

- x Teacher training and teacher recruitment
- x Classroom construction
- x Girls' education
- x Educational policy reform
- x Enhanced computer facilities and computer training for teachers

F. Primary USAID Partners

- x Academy for Educational Development
- x University of Massachusetts
- x Research Triangle Institute
- x American Institutes for Research
- x Creative Associates International, Inc.

**UGANDA (continued)****G. Results from USAID-funded Activities**

- The percentage of students completing primary school has increased  
**Indicator:** Number of students of any age completing grade 7 as a percentage of the total cohort entering grade 1 seven years earlier

YEAR	PLANNED	ACTUAL

\* Revised Data

\*\* Preliminary Data

## GUATEMALA

A. Strategy Statement

To improve educational access, equity, and quality by providing intercultural and bilingual primary education for children of the Quiché Department; increasing rural community access to education services; implementing education strategies and policies that enhance gender and cultural pluralism; strengthening teacher training; developing new instructional materials and methodologies; increasing community involvement in education; and enhancing the capacity of the Ministry of Education and civil society groups.

B. Country Statistics <sup>1\*</sup>

- x # Primary school-age children: 1.8 million
- x % Primary school-age children enrolled: 83%
- x # Primary school-age children out of school: 310,000
- x Primary school student to teacher ratio: 35:1
- x Expenditures on education as % GNP: 2%
- x Host country expenditures on primary education as a % of total education expenditures: 63%

C. Basic Education Problems

- x Urban bias in school coverage and quality
- x Centralized decision-making
- x Ethnic and gender inequities
- x Low primary school attendance in rural areas
- x Low female primary school completion in rural areas
- x Few schools with bilingual teachers
- x Low government funding for education
- x Lack of constituencies capable of influencing government educational policy & resource allocation

D. USAID Funding

FY 1999 \$2.650 M	FY 2000 \$2.535 M	FY 2001 \$2.529 M
FY 1999 \$1.782 M (ESF)	FY 2000 \$0.650 M (ESF)	FY 2001 \$0 M (ESF)

E. USAID Basic Education Activities

- x Girls' education
- x Primary scholarships for rural girls
- x Bilingual programs for indigenous children
- x University scholarships for marginalized groups
- x Teacher training
- x Bilingual education monitoring and evaluation and applied research
- x Community participation in educational management and decision making
- x Application of innovative instructional materials and methodologies
- x Creation of community education centers
- x Application of Information Communication Technology
- x Youth and adult literacy
- x Educational policy reform support

**GUATEMALA (continued)****F. Primary USAID Partners**

- Rafael Landivar University
- Save the Children
- World Learning
- Juarez and Associates
- Academy for Educational Development
- American Institutes for Research

## PERU

### **A. Strategy Statement**

To ensure that more rural girls have access to and complete quality primary and secondary schooling by: expanding opportunities in target areas; raising consciousness about barriers to girls' education and the importance of providing quality education for girls; implementing community and school-based programs that address constraints to girls' education; and enhancing local capacity to implement policies that support quality education for girls.

### **B. Country Statistics<sup>1\*</sup>**

- # Primary school-age children: 3.4 million
- % Primary school-age children enrolled: 103%
- # Primary school-age children out of school: 0
- Primary school student to teacher ratio: 27:1
- Expenditures on education as % GNP: 3%
- Host country expenditures on primary education as a % of total education expenditures: 35%

### **C. Basic Education Problems**

- Low rates of enrollment and poor quality of education for rural girls
- Large percentage of overaged girls enrolled in school
- Lack of community involvement in schools
- Need for more intercultural awareness and materials in schools
- High female illiteracy rates in many rural provinces

### **D. USAID Funding**

FY 1999 \$1.050 M	FY 2000 \$0.500 M	FY 2001 \$1.098 M
-------------------	-------------------	-------------------

### **E. USAID Basic Education Activities**

- Girls' education programs
- Occupational training for children, particularly orphans and girls
- Training Ministry of Education officials and working toward educational policy reform
- Bilingual education and creating educational materials in indigenous languages
- Distance education
- Strengthening parent and community involvement in schools
- Providing educational counseling to youth affected by political violence
- Teacher training
- Promoting equity and democratic principles in the classroom
- Constructing classrooms

## Endnotes

<sup>1\*</sup> The country statistics presented throughout this report (see Country Overviews, sections B) are available through USAID's Global Education Database (GED) Online. In most cases, data presented are from the years 1996-2001, with the most recent figure cited. Data in the regional overview tables taken from years prior to 1996 are indicated by the following symbol: †.

USAID Global Education Database (GED) Online. Design and created by USAID. Data collected from UNESCO Institute of Statistics. [[http://www.usaid.gov/educ\\_training/ged.html](http://www.usaid.gov/educ_training/ged.html)]. March 2002.

<sup>2</sup> The “% Primary School-age Children Enrolled in School” (Primary Net Enrollment Ratio) is the enrollment of primary students of the official age expressed as a percentage of the primary school-age population. The 1999 UNESCO Statistical Yearbook. (UNESCO. 1999. UNESCO Statistical Yearbook. Paris, France: UNESCO Publishing) defines Net Enrollment Ratio (NER) in Primary Education as the enrollment of the age group which officially corresponds to primary schooling, expressed as a percentage of the population of the same age group. Although theoretically the NER cannot exceed 100%, values up to 105% have been obtained, indicating inconsistencies in the enrollment and/or population data. UNESCO defines the Gross Enrollment Ratio as the total enrollment in a specific level of education, regardless of age, expressed as a percentage of the official school-age population corresponding to the same level of education in give school-year. For Ghana and Nigeria, the Primary Net Enrollment Ratios are not available; hence, Primary Gross Enrollment Ratios are presented.

USAID Global Education Database (GED) Online. Design and created by USAID. Data collected from UNESCO Institute of Statistics. [[http://www.usaid.gov/educ\\_training/ged.html](http://www.usaid.gov/educ_training/ged.html)]. March 2002.

<sup>3</sup> The estimated “Number of Primary School-age Children out of School” was calculated by using the following formula = (# of primary school-age children) – [(# primary school-age children) x (primary school net enrollment ratio)].

USAID Global Education Database (GED) Online. Design and created by USAID. Data collected from UNESCO Institute of Statistics. [[http://www.usaid.gov/educ\\_training/ged.html](http://www.usaid.gov/educ_training/ged.html)]. March 2002.

<sup>4</sup> UNESCO Institute for Statistics (UIS), 2002. UIS literacy estimates were assessed in January 2002 for countries that have population censuses (121 countries). These data represent the adult population (15 years and older).

<sup>5</sup> Host country expenditure data from the UNESCO Institute of Statistics in 1990 US\$ were converted to 1999 US\$ by multiplying the 1990 US\$ amount by the ratio of Consumer Price Index (CPI) for 1999 (109.3) by the CPI for 1990 (85.7), which is 1.2754.

USAID Global Education Database (GED) Online. Design and created by USAID. Data collected from UNESCO Institute of Statistics. [[http://www.usaid.gov/educ\\_training/ged.html](http://www.usaid.gov/educ_training/ged.html)]. March 2002.

<sup>6</sup> The “USAID Budget for Basic Education” figures were taken from USAID's activity code database in the Office of Management and Budgeting.

<sup>7</sup> Information about basic education problems, activities, partners, and costs were extracted from USAID 2002 and 2003 Results Review and Resource Requirements reports for each country. The Results Review and Resource Requirements documents for each country can be found [[http://cdie.usaid.gov/r4/r4\\_list.cfm](http://cdie.usaid.gov/r4/r4_list.cfm)].
